

SHED BUYER'S GUIDE

Find the perfect garden shed for you, with the help of our guide.

1) Main Use

Whether you're looking to create a potting shed or need storage for your bike, we've covered a range of options for how might use your building, so you can easily find a shed which is right for you.

Bike Storage

If you are looking for somewhere to store your bikes, we have a fantastic range of sheds specifically designed to do just that.

Mini Keeper Range

This great-value Mini Keeper Bike Store offers an inexpensive wooden bike storage solution, constructed with 7mm overlap cladding and available in size 3x8, this compact bike shed is a traditional and practical storage solution.

Mini Master Apex & Mini Master Pent

For a more premium version, we also offer the Mini Master Apex and Mini Master Pent, these sheds are constructed from solid T&G cladding and are available in sizes 3x8, 4x8, 6x3 and 6x4. For reliable storage for your bikes, the Mini Master won't let you down.

Heavy Duty Bike Store

Alternatively, our strongest bike storage options include the 28mm T&G Motorbike Store and Heavy Duty Bike Store. These provide more premium quality builds that are fully weatherproof and will guarantee you excellent storage for your bikes.

Garden Storage

From standard value to high-quality, we offer a great range of sheds to choose which are perfect for garden storage.

Storer Overlap

This rustic, value unit uses 5mm overlap panels which allow rainwater to run off the side of the building, creating a basic shelter for your gardening items.

Storer T&G

This higher-quality shed is made using thicker, 11mm boards with a tongue and groove technique. The shed has a traditional Apex roof and is a perfect storage solution for your garden.

Keeper Range

The Keeper is constructed using 7mm overlap cladding and available in sizes 4x6, all the way up to 16x8. This a great value shed which will provide good shelter for your garden items.

Master Range

Comprised of Apex and Pent roof options, Master sheds offer a high-quality 11mm tongue and groove construction which is strong and well-equipped for storing all your gardening tools.

DIY and Workshops

A shed can make a perfect space for DIY tasks or your own workshop right in your garden. We offer a great range of compact and large units, as well as high-quality to heavy duty builds.

Master Range

The T&G construction and wide T&G boarded doors offer easy access in and out of the build and a strong unit.

Boxer Range

If you'd prefer to opt for a metal workshop, the Boxer Pent and Boxer Apex, both offer a tough galvanised steel coating and solid construction.

Expert Range

Our Expert range features Corner, Apex, Reverse Apex and Pent styles which have all been designed to be ideal workshops for your garden.

Heavy Duty Cabins and Workshops

Our heavy duty cabins and workshops offer a luxury workspace for your garden, In a range of styles, sizes and designs.

Mower Store

We offer the perfect storage solution for lawn mowers. The Mini Master and Mini Keeper Ranges are ideal as they provide quality shelter for your mower.

The Mini Maser Apex

Constructed from a solid 11mm T&G cladding, with a traditional apex roof. This style is perfect for homeowners looking for compact garden storage which is reliable and will fit into a traditional garden setting.

The Mini Master Pent

If prefer more modern styles, the Mini Master Pent offers the same high-quality construction but with a pent roof design. The great thing about our sheds is that they are versatile buildings which give you the option to choose a shed which perfectly suits your garden and your own tastes. This shed is available in sizes 6x3 and 6x4.

Mini Keeper

The Mini Keeper makes a standard value alternative for storing your gardening tools. Constructed from 7mm overlap cladding, this shed will provide your lawnmower with standard protection from the weather and a compact store.

Potting Sheds

If you're looking to use your garden shed as a potting shed, you will want to opt for unit with windows. This will provide you with a well-lit area which is comfortable to spend time in, as well as provide your plants with plentiful light.

Keeper Range

Grow your plants in harmony with a great value shed. The windowed Keeper provides good shelter for your plants and an ideal space to use as a potting shed. This shed ranges from a compact 4x6 size, all the way up to 16x8.

Master Range

For a high-quality potting shed, our windowed Master Tongue and Groove Apex shed is the perfect, potting solution. The strong T&G construction means the shed provides fantastic shelter for your plants.

Expert Range

For maximum storage in your garden, you may want to opt for a corner unit such as the windowed Expert Corner Workshop Shed. The Expert Pent features a modern, pent roof and extra-tall design, making moving around in the shed easy.

2) style

Our fantastic garden sheds are available in a range of styles to suit everyone's tastes and needs. We offer traditional Apex sheds, as well as Reverse Apex and Pent styles.

Apex

For a garden which has a traditional design, you may want to opt for a traditional Apex style shed. We have a great range of Apex style sheds which will perfectly complement your garden.

Reverse Apex

Sheds which have a Reverse Apex design are great for storing long, bulky items. This style of shed also provides extra height which is great for manoeuvring gardening items in the shed.

Pent

For a more contemporary garden shed, our Pent sheds look great in any modern surrounding and provide extra headroom at the front of the build.

Whether used for garden storage or a workshop, we have a garden shed which has a style that is right for you.

3) Wooden, Metal or Plastic?

Once you've decided on the style, you can move onto choosing the material of the shed. Each material has different qualities so you'll definitely be able to find one that matches your style and requirements.

Wooden Sheds

Traditional wooden sheds make a solid and reliable storage solution which can be customised. Timber is a versatile material known for its strong properties and we offer a range of wooden shed with Apex, Reverse Apex and Pent styles.

Metal Sheds

Metal sheds are extremely secure and weather resistant which makes an ideal choice for garden storage. They also require little to no maintenance and over the years have become more attractive, We even offer a wood grain effect metal shed.

Plastic Sheds

If you need a lightweight shed which is maintenance free, stain, rot and rust resistant, a plastic shed makes the perfect unit. They are also the easiest to assemble.

4) Wooden Construction

The construction of the shed impacts how strong and durable it is, as well as how weatherproof the build is against the elements. We offer a choice of rustic, overlap and interlocking T&G cladding which come in a range of thicknesses.

Rustic

For a shed which is used for basic storage, you may opt for the rustic 5mm, this cladding option has a rustic appearance.

Overlap

The overlap technique allows rain to run off the shed, however, boards do not form a closed seal so they can experience moisture. This is not an issue if the shed is used for garden storage and provides a more value cladding option.

Interlocking T&G

Tongue and groove sheds have an interlocking construction which effectively works to keep the elements out. We offer 11mm and 19mm tongue and groove cladding as well as heavy duty 28mm.

5) Access

Consider where you want to access your garden shed and where it will be located. Great features of our sheds such as wide double doors make accessing your shed just that bit easier.

Double Doors or Single Door

Will you be moving large objects in and out? If you are thinking about storing larger objects in the shed such as garden furniture, lawn mowers or a workbench, you may need double door access.

A number of our sheds are built with wide double doors, which make accessing the unit as easy as possible.

Although single doors don't open as wide as double doors, they do maximise internal storage space as they take up less wall space.

Security

If you will be storing valuables inside the shed you may want to think about securing your garden building. What kind of locking system does your shed need? Will you need to add a padlock?

For maximum security, you may be better off choosing a windowless shed, as this will keep your expensive goods safely out of sight.

6) Roof Options

Want your garden shed to be prepared for the elements? Our fantastic a range of roof options, from basic to heavy duty protection, will do just that.

Durelis

Our Durelis roof is made from a water-resistant chipboard, pre-cut to size and easily attached. The Durelis solid sheet is a stronger, more reliable roofing option to an OSB roof and provides good protection from the elements.

OSB

This is a value roof which is provided as a standard package to some of our basic sheds. The roof will provide basic protection for your items stored.

Roofing Felt

For maximum protection for your shed roof, you should consider adding roofing felt. We offer a standard black sand felt with most of our sheds, or you can upgrade to a green mineral felt for excellent protection.

Shingles

For premium roof cover, we also offer shingles which are made from thicker material than our roofing felt and are great for heavy duty use.

We hope this helps!
